

VINAY KUMAR DUVVA

Hyderabad, IN | +91 - 9398215895 | duvvavinaykumar@gmail.com | LinkedIn | Git Hub

Cloud Support Engineer | Cloud Infrastructure Enthusiast | AWS, Azure, GCP Certified

PROFESSIONAL SUMMARY

Cloud infrastructure enthusiast with 2+ years of hands-on experience, certifications across AWS, Azure, and GCP, and a hands-on project portfolio built from scratch on Free Tier resources. Skilled in EC2, S3, IAM, Terraform, GKE, and Azure VNet architecture, with a consistent focus on reliability, security, and clean documentation. Eager to apply that foundation in a cloud engineering or infrastructure support role where real-world impact starts on day one.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, VPC, IAM), Azure (VNETs, NSGs, VPN), Google Cloud (GCE, VPC, Cloud NAT).
- **Infrastructure as Code:** Terraform, Helm charts, CloudFormation.
- **Containers & Orchestration:** Docker, Kubernetes, Helm.
- **CI/CD & Version Control:** Git, GitHub Actions, Jenkins, GitHub.
- **Monitoring & Logging:** Stackdriver (Cloud Monitoring/Logging), Prometheus, Grafana, ELK Stack.
- **Networking:** Subnetting, Routing, DNS, VPN, Load Balancers, Firewall Rules, NAT, NSGs.
- **OS & Scripting:** Linux, Windows Server, Python, Bash/Shell Scripting.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

May 2024 – Jun 2026

Senior Process Executive – Digital Content Services (Google gTech CF Snippets)

Hyderabad, India

- Maintained a 99.9% quality across complex data curation & extraction workflows supporting high-volume tasks for US-based clients.
- Exceeded productivity benchmarks consistently, sustaining a 118.26% productivity rate & 103.47% utilization over the review period.
- Resolved 50+ ad hoc BigQuery (BQ) support requests alongside core responsibilities, keeping operations running without escalation.
- Completed all data output batches within a 74.55% TAT, meeting strict delivery SLAs across high-volume workloads.
- Mentored 10+ new associates and drove cross-training initiatives, contributing to a 30% improvement in team throughput.
- Authored and maintained process documentation and SOPs to reduce onboarding time and standardize team practices.

TECHNICAL PROJECTS

AWS Cloud Infrastructure Deployment – Git Repo

Dec 2025 – Jun 2026

- Secured AWS root account by enabling MFA, CloudWatch/SNS billing alerts, enforcing a least-privilege IAM password policy.
- Created IAM users, groups, and scoped policies from scratch, documented across 4-5 pages of architecture and access control notes.
- Deployed a static website on S3 & served it globally through a CloudFront distribution across 50+ edge locations at zero cost.
- Configured Route 53 DNS routing to the CloudFront, offloading origin load through edge caching & staying within Free Tier.
- Provisioned a secure EC2 instance using custom networking, SSH, and SSM Session Manager to remove public port 22 exposure.
- Attached an IAM role to the EC2 instance for credential-free AWS CLI access, following least-privilege principles.
- Enabled S3 versioning for point-in-time recovery, protecting against accidental deletion and supporting compliance requirements.
- Implemented S3 lifecycle policies to transition data to Standard-IA at 30 days & Glacier at 90 days, cutting storage costs up to 95%.
- Applied noncurrent version lifecycle rules to manage version accumulation and prevent excessive storage growth.
- Implemented S3 cross-region replication to establish a disaster recovery pattern meeting production durability standards.

Multi-Region Azure Virtual Network Deployment – Link

Mar 2025

- Designed a 3-region VNet architecture for Contoso Ltd. covering across East US, West Europe, and Southeast Asia.
- Configured CoreServicesVnet (East US) with web, database, and shared subnets, featuring VPN for hybrid connectivity.
- Deployed ManufacturingVnet (West Europe) with segmented subnets for IoT sensors and operations traffic.
- Provisioned ResearchVnet (Southeast Asia) as an isolated environment to prevent production cross-contamination.
- Utilized non-overlapping CIDR blocks across regions to ensure scalable future growth.
- Enforced traffic segmentation and restricted lateral movement using NSGs and custom routing tables.
- Improved network security by 40% via VPN, NSG rules, and subnet access controls.
- Validated full deployment via Azure Portal and authored 7+ pages of technical documentation.

EDUCATION

Sri Indu Institute of Engineering and Technology, Hyderabad

Aug 2019 – Jul 2023

Bachelor of Technology, Electronics and Communication Engineering

GPA: 7.06

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate | *Certificate* Feb 2026
- Google Professional Cloud Architect | *Certificate* Jan 2026
- Microsoft Azure Network Engineer Associate (AZ-700) | *Certificate* Apr 2025
- Microsoft Azure Fundamentals (AZ-900) | *Certificate* Mar 2025
